*\*Minimum size: 50 GB committed disk*

#### Benefits

The Enterprise Storage Area Network solution enables companies to have off premise storage and backup of files without the high end equipment investment. Not only will files be stored off premise in a secure data center, the ability to restore data easily is attained due to the frequency of data backup. The SAN storage solution may be integrated into a Disaster Recovery Program. Upgrades to systems become painless. The HeatSeeker Enterprise solution is fully redundant with duo control processors and includes 24x7 problem management and resolution.
