## The Office that Follows You

### Product Features

Shared Secure Network File Server

Backup of Network Files

Secure Remote User Access

- Virtual Private Network
- Connectivity to Company File Server
- Directory services & permissions
- Turns your virtual server into a powerful collaborative server

### Benefits

Utilizing HeatSeeker infrastructure gives small and medium businesses the look and feel of a large company. It also expands security for your business by providing managed firewalls, a secure data center and network surveillance. The shared network file server eliminates the need for temporary file creation and storage, and expands efficiency of any small office. Now the virtual worker can have the look and feel of a physical office, from anywhere.
